PROFESSIONAL SUMMARY

Product-driven CTO and Senior Full-Stack Engineer specializing in MERN stack architecture and scalable startup platforms. Founder and technical lead of Remina and RestaurantOS, delivering real-time systems across event media sharing and restaurant operations. Experienced in system design, DevOps deployment, payments integration, and team leadership. Passionate about transforming ideas into production-ready digital products with measurable business impact.

PROFESSIONAL EXPERIENCE

CTO / Lead Engineer — Remina Technologies (2025 - Present)

- Architected an AI-powered event media sharing platform with real-time chat and notifications.
- Built scalable backend services using Node.js, Express, MongoDB, Redis, and Socket.IO.
- Designed wallet and payment workflows using Paystack.
- Led frontend development with React and mobile components with React Native.
- Implemented Docker-based deployment pipelines on VPS infrastructure.
- Managed product roadmap, feature planning, and technical strategy.

Founder / Lead Developer — RestaurantOS (2022 - Present)

- Designed and built a multi-tenant restaurant management system supporting POS, inventory, staff scheduling, and order workflows.
- Implemented Redis and RabbitMQ for real-time operations and print job handling.
- Led full product lifecycle from UI/UX to backend services and deployment.
- Delivered production-ready systems for live restaurant environments.

Full-Stack Developer — Zinger Technologies Ltd (2021)

- Built full-stack applications using HTML, CSS, JavaScript, React, Node.js, and MongoDB.
- Collaborated on group projects and participated in code reviews.
- Delivered capstone projects including an advanced blogging platform.

EDUCATION

Afe Babalola University
Bachelor of Science - Geology

2016 - 2021
